Education Qualifications

New horizon college of Engineering Bengaluru,

Bachelor of Engineering in Computer Science and Engineering,

2023-2027

Skills :

- Languages: Java , Python , Java script .
- Web Technologies: HTML, Tailwind CSS, React.js.
- Databases & Tools: SQL, MongoDB, Git, GitHub, VS Code.
- Soft Skills: Problem Solving, Leadership, Time Management, Teamwork, Quick Learner.

Projects :

- ❖ **AI Smart Commerce – Full-Stack** : Developed a premium e-commerce platform using the MERN stack (MongoDB, Express.js, React, Node.js) integrated with Google Gemini and OpenAI APIs. Features an AI Goal-Based Shopping Planner to generate custom product bundles matching user goals (e.g., gaming or streaming setups), an AI comparison engine, and a real-time review summarizer. Implemented Razorpay payment integration, a dynamic promo coupon system, print-optimized invoices, and recursive input sanitization middleware to prevent XSS and NoSQL injection. Designed a responsive, dark-mode-persisted user interface with debounced search and admin dashboards for tracking real-time sales analytics and inventory.
- ❖ **AI-Microservice** : Developed an enterprise-grade AI microservices platform that delivers secure, scalable, and reusable AI capabilities through REST APIs. Built a decoupled architecture with a React frontend, Node.js API Gateway, and Python FastAPI AI Engine integrated with Groq LLM, Retrieval-Augmented Generation (RAG), conversation memory, and tool calling. Implemented JWT authentication, Role-Based Access Control (RBAC), MongoDB Atlas, ChromaDB, Docker-based deployment, Swagger API documentation, and centralized logging for production-ready AI services.
- ❖ **Poultry Management Dashboard (Full Stack Internship)** : The Poultry Management Dashboard is a web-based application developed to streamline daily poultry operations by digitizing production data such as daily damage records and NECC rate updates. Built with React and Tailwind CSS, it offers a responsive, reusable, and user-friendly interface. Firebase is used for authentication and real-time data storage, enabling secure access, accurate data management, and improved operational efficiency by replacing manual record-keeping.

Experience:

Kacklewalls Nutrition Pvt Ltd Online

Full Stack Developer, [4 months]

- Web Application Development: Built and maintained a scalable web application using React.js, javascripts.
- Backend Database Management: Developed RESTful APIs and integrated Firebase for authentication, storage, and real-time database functionalities.
- Deployment : Deployed applications using Vercel , ensuring smooth workflows via GitHub.
- Backend Database Management: Developed RESTful APIs and integrated Firebase for authentication, storage, and real-time database functionalities.
